

Asia: Fast-Track to You

Let the locals do the talking!

Dear Adviser,

2011 was a year of disappointment, doubt and frustration over the Asian markets. We saw negative correlation between company earnings, and decreasing stock values. We saw slow gains in confidence quickly wiped out by negative sentiment and uncertainty.

Thus to give an in-depth perspective, we will be bringing three key members from our award winning Hong Kong based fund manager – Value Partners Limited to Brisbane. They will present on how last year unfolded and how this year's market conditions may shape up. They will also be sharing their investment strategies moving forward. This is a key year for what is hoped to be turning market sentiment, so come along as this is your opportunity to get some answers.

Please RSVP promptly as seats are limited.
